Provision of Furniture to the [REDACTED] Station

1. The suggestion made by you on 24 November 1954 to the Inspector General and myself, that employees reporting to the [REDACTED] station bring 25X1A6a new Government furniture with them and that said furniture be sold on the local open market upon the expiration of the tour of duty, has been considered and studied by various Agency officials and components.

2. After considering the suggestion in light of Agency policy, security, cover, local circumstances, relations with the host country and other factors, it has been determined not to adopt the suggestion at this time. The quarterly problem is being studied and determination on Agency policy is expected shortly.
